**DEPARTMENT OF ENVIRONMENT, HEALTH, AND NATURAL RESOURCES
DIVISION OF WATER QUALITY**

During the 1996 legislative session the North Carolina General Assembly enacted Senate Bill 1317(1995[1996 Regular Session] C. 648) into law on June 21, 1996. This law specified that certain owners and operators of underground storage tanks who have tanks classified as having a C, D, or E impact, will not be required by the Department to cleanup contaminated sites pending the adoption of risk-based assessment and cleanup rules. The law also restricts these persons from gaining access to or continuing to receive payments from the state's Commercial and Non-Commercial Leaking Petroleum Underground Storage Tank Trust Funds, unless the responsible party can meet the criteria outlined in Chapter 648, Section 1(f) of this law. With regards to the requirements of Chapter 648 of the 1995 Session Laws Section 1(b), all sites classified as A or B are Class AB and all sites that are classified as C, D, or E are Class CDE.

Pursuant to Chapter 648, Section 1 of the bill, the Department is continually required to give notice of the classification of these sites in the *North Carolina Register*.

The listing includes the classifications for new releases and discharges from July 1, 1996 through June 30, 1997 and revisions to classifications from previously discovered sites.

I. JURISDICTION

The Secretary of the Department has authority to enter into this Consent Order pursuant to Article 9 of Chapter 130A of the North Carolina General Statutes, N.C.G.S. § 130A-290, et seq. The Secretary has delegated this authority to the Director of the Division.

II. PARTIES

This Consent Order is entered by and among:

- A. The North Carolina Department of Environment, Health and Natural Resources, Division of Waste Management ("Division");
- B. The members in good standing of the Seaboard Group II who are signatories to this Consent Order; and
- C. The City of High Point ("City").

III. INTRODUCTION AND STATEMENT OF PURPOSE

- A. The City owns and formerly operated the Landfill located on Riverdale Drive, Jamestown, Guilford County, North Carolina.

Since 1974, the Landfill has been permitted to receive solid, non-hazardous waste for disposal under DHS Permit No. 41-01. Prior to the establishment of the State Solid Waste Management Program, the City operated the Landfill for disposal of solid wastes, including the operation of pits where solvents were burned in the late 1960s. The Landfill is located on approximately 125 acres of gently rolling terrain bordering on the west bank of the Deep River, and lies about 2 miles east of High Point. The Landfill is bordered on the south by Riverdale Drive and the former Seaboard Chemical Corporation facility.

On or about January 4, 1991, the Division issued an Administrative Order to the City requiring the City to address groundwater and surface water conditions in the vicinity of the Landfill. On or about May 30, 1991, the City submitted to the Division a Work Plan for assessing the ground and surface water conditions in the vicinity of the Landfill. On or about June 25, 1991, the City and the Division entered into an Administrative Consent Order Docket No. 91-SW-1 pursuant to which the City was ordered to perform the actions set forth in the approved Work Plan. The City completed specific tasks set forth in the approved Work Plan.

The City of High Point discontinued active landfill operations at the Landfill in October 1993. The Landfill has been capped with at least two feet of cover soil, with vegetation to prevent erosion.

By letter dated March 6, 1995 to Mr. Perry Kairis, Director of Public Works for the City of High Point, the Solid Waste Section of the Division required the City to submit a plan for the next phase of groundwater contamination assessment at the Landfill. The Division encouraged the City to cooperate with the members of the Seaboard Group II to assess groundwater contamination at both the former Seaboard Chemical Corporation facility and the Landfill (collectively referred to herein as "the Site").

- B. Seaboard Chemical Corporation operated a facility for the treatment, storage and/or disposal of solid waste, including hazardous waste and hazardous substances, at property located at 5899 Riverdale Drive, Jamestown, Guilford County, North Carolina from 1974 until 1989. Among other activities, Seaboard Chemical Corporation engaged in solvent distillation and recycling and blending of high-BTU substances for sale as fuel. On or about November 15, 1989, Seaboard Chemical Corporation discontinued operations and filed for bankruptcy in the U.S. Bankruptcy Court. A substantial quantity of hazardous waste and/or substances remained at the Seaboard Chemical Corporation facility in drums, tanks, equipment and structures.

The Trustee in Bankruptcy for Seaboard Chemical Corporation retained Four Seasons Industrial Services, Inc. to remove a portion of the hazardous waste and/or substances contained in tanks and drums at the Seaboard Chemical Corporation facility using funds from the post closure trust fund letter of credit held by the State of North Carolina and monies from the North Carolina Emergency Response Fund. The Trustee had insufficient funds to complete the removal of hazardous waste and/or substances from the Seaboard Chemical Corporation facility.

On or about May 29, 1992, William W. Cobey, Jr., Secretary of the North Carolina Department of Environment, Health and Natural Resources ("Department") issued an Imminent Hazard Order pursuant to N.C.G.S. § 130A-303 concerning solid waste at the former Seaboard Chemical Corporation facility. The Secretary determined that the Trustee in Bankruptcy for Seaboard Chemical Corporation was incapable of maintaining containment of the hazardous waste and/or substances. The Secretary ordered all generators, transporters, owners and/or operators of the Seaboard Chemical Corporation facility to abate the imminent hazard then existing at that facility by removing and disposing of hazardous waste and hazardous substances contained in tanks, pipes, equipment and structures at the facility and by undertaking a preliminary investigation of soil and groundwater contamination at the former Seaboard Chemical Corporation facility.

On or about May 29, 1992 an Administrative Order on Consent ("AOC") concerning the former Seaboard Chemical Corporation facility was entered into between the Division and the members of Seaboard Group I. Pursuant to the AOC, the members of Seaboard Group I agreed to address conditions at the former Seaboard Chemical Corporation facility which the Secretary deemed to create an imminent hazard. The members of Seaboard Group I agreed to undertake, perform and finance certain actions at the facility as described in the Work Plan For Surface Removal ("Removal Work Plan") submitted to the Division on November 15, 1991 and attached as Appendix B to the AOC.

On or about September 1992, the members of Seaboard Group I completed the Surface Removal as described in the Removal Work Plan. All liquids, sludges and other waste materials, including all hazardous waste and/or substances contained in tanks, pipes, equipment and structures were removed from the facility; the aboveground tanks, equipment and vessels were decontaminated to remove residual wastes; and miscellaneous solid wastes were collected and disposed of properly. By letter dated February 18, 1993 to the Trustee in Bankruptcy of Seaboard Chemical Corporation, the Division acknowledged

completion of the Removal Work Plan.

The members of Seaboard Group I also contracted with Geraghty & Miller, Inc. to conduct a Remedial Site Inspection to fulfill the directive of the Secretary's Imminent Hazard Order requiring a preliminary investigation of soil and groundwater contamination at the former Seaboard Chemical Corporation facility. Geraghty & Miller conducted the Remedial Site Inspection pursuant to the Work Plan for Remedial Site Inspection (August 1992) approved by the Division in October of 1992. The Work Plan for Remedial Site Inspection was implemented in late 1992 through February 1993. The Final Report on the Remedial Site Inspection was submitted to the Division in May of 1993.

By letter dated July 28, 1993 to the Trustee in Bankruptcy of Seaboard Chemical Corporation, the Division acknowledged that the tasks in the Work Plan had been substantially completed. Completion of the Removal Work Plan and the Work Plan for Remedial Site Inspection abated the imminent hazard determined by the Secretary to then exist at the Seaboard Chemical Corporation facility.

- C. On or about January 30, 1996, the City, Seaboard Group II and the Division entered into an Administrative Order on Consent Pursuant to Article 9, N.C.G.S. Chapter 130A ("AOC") under which the City and the Seaboard Group II agreed to perform a Remedial Investigation of the Site in accordance with a Remedial Investigation Work Plan approved by the Division. Contractors hired by the City and Seaboard Group II are in the process of completing the Remedial Investigation. Based on the results of the Remedial Investigation to date, the Division has determined that a Feasibility Study of the Site is necessary.

This Consent Order is entered into for the purpose of further addressing the Site. In entering into this Consent Order, the objective of the parties is performance of a Feasibility Study of the Site in accordance with a Feasibility Study Work Plan approved by the Division.

IV. FINDINGS OF FACT

- A. "The Site" is the former Seaboard Chemical Corporation facility located at 5899 Riverdale Drive, Jamestown, North Carolina, EPA Identification No. NCD-071-574-164, which is currently under the control of the Trustee in Bankruptcy of Seaboard Chemical Corporation, and the City of High Point former Riverdale Drive Landfill which is adjacent to the former Seaboard Chemical Corporation facility, as depicted in Exhibit 1.
- B. Treatment, storage and/or disposal of hazardous substances has occurred at portions of the Site.
- C. Municipal solid waste, including industrial waste, was disposed in the Landfill for approximately forty (40) years.
- D. Soil sampling at the Site has revealed the presence of volatile organic compounds and semi-volatile organic compounds, including but not limited to acetone, 1,2-dichlorobenzene, 1,1-dichloroethene, 1,2-dichloroethene (total), methylene chloride, 1,1,1-trichloroethane, phenol, and naphthalene, bis-2 ethyl hexyl phthalate, and 1,2,4 trichlorobenzene.
- E. Groundwater sampling at the Site has revealed the presence of volatile organic compounds and semi-volatile organic compounds, including but not limited to acetone, benzene, 1,1-dichloroethane, 1,2-dichloroethane, 1,1-dichloroethene, 1,2-dichloroethene (total), methylene chloride, 1,1,1-trichloroethane, phenol, and naphthalene.

V. CONCLUSIONS OF LAW

- A. The substances identified in Sections IV.D and E above are "hazardous substances" as defined in CERCLA.
- B. Disposal of hazardous substances referred to in the preceding paragraph has occurred at portions of the Site.
- C. There has been a release or threatened release of hazardous substances at the Site.
- D. Solely for purposes of this Consent Order and without admitting liability or fault, the City of High Point and the members of the Seaboard Group II are owners, operators or other responsible parties in relation to the Site within the meaning of Article 9 of Chapter 130A of the North Carolina General Statutes, N.C.G.S. 130A-290, et seq. and CERCLA.
- E. This Consent Order is authorized pursuant to the power of the Secretary under Article 9 of Chapter 130A of the North Carolina General Statutes and by delegation to the Director, to enter into agreements with owners, operators, and/or other

responsible parties for implementation of remedial investigation and feasibility study programs in accordance with work plans approved by the Department.

VI. WORK TO BE PERFORMED

All work performed under this Consent Order shall be under the direction and supervision of a professional engineer or a licensed geologist with expertise in hazardous substance site cleanup. Respondents shall enter into a contract with the Contractor(s) to perform the Feasibility Study within thirty (30) days of the effective date of this Consent Order.

- A. Within sixty (60) days of entering into the contract with Respondents, the Feasibility Study Contractor ("FS Contractor") shall prepare the Feasibility Study Work Plan ("FS Work Plan") for the Site and submit the FS Work Plan to the Division for its review and approval.
- B. Within sixty (60) days after approval of the FS Work Plan by the Division, Respondents shall begin the Feasibility Study.
- C. Respondents shall adhere to the schedule set forth in the FS Work Plan to the extent practicable except as may be modified by agreement of the parties in writing, or for good cause as described in Section IX.
- D. Upon completion of the Feasibility Study, Respondents shall submit to the Division four (4) copies of a Feasibility Study Report ("FS Report") documenting implementation of the Work Plan.
- E. In the event the Director finds that any part of the FS Report is deficient, he shall so notify the Respondents. Within 30 days of receipt of such notice, the Respondents shall submit to the Director either (1) data, information, material and/or a plan to correct such claimed deficiency, or (2) objections to the Director's notice of deficiency and the reason(s) for such objections. In the event the Respondents submit objections, the parties shall in good faith endeavor to resolve such objections. If such objections cannot be resolved within 30 days, then the objections shall be subject to the dispute resolution provisions set forth at Part X of this Consent Order.
- F. The Director shall notify the Respondents in writing when he determines that the FS Report is complete. However, if the Director fails to notify the Respondents within 120 days after the Respondents have submitted the FS Report to the Director either that he has determined the FS Report to be complete or that the FS Report is deficient, then the FS Report shall be deemed to be satisfactory and complete.
- G. The parties agree that work performed in accordance with the FS Work Plan approved by the Division will be consistent with the National Contingency Plan.

VII. FURTHER SITE WORK

Further necessary work at the Site, if any, including interim response measures, may be undertaken in accordance with a separate and further Consent Order(s) or pursuant to other authority.

VIII. SAMPLING, ACCESS, AND DATA/DOCUMENT AVAILABILITY

- A. The Division or its representatives shall be permitted to take split or duplicate samples of any samples collected by the FS Contractor pursuant to this Consent Order. The FS Contractor shall notify the Division not less than ten (10) days in advance of any field activity. This notification may be given verbally in the field by the FS Contractor to the Division.
- B. The Respondents shall be permitted to take split or duplicate samples of any samples collected by the Division, and the Division shall give Respondents prior reasonable notice of such sampling.
- C. While this Consent Order is in effect, Division personnel and their representatives may to the extent authorized by the Trustee in Bankruptcy of the Seaboard Chemical Corporation, in addition to exercising any related legal rights, enter the Site without notice at all times and, while present: review the progress of activities required by this Consent Order; conduct such tests as the Division deems necessary; verify the data submitted to the Division by Respondents; inspect and copy any and all records, files, photographs, operating logs, contracts, sampling and monitoring data, and other documents relating in any way to this Consent Order; and otherwise assess Respondents' compliance with this Consent Order. All parties with

access to the Site pursuant to this paragraph shall comply with all approved health and safety plans.

- D. Unless a claim of confidentiality pertaining to any documents or other information provided to the Division under this Consent Order is made pursuant to law and adequately substantiated when the information is submitted, such information may be made available to the public by the Division without further notice to the Respondents. The Respondents agree that under no circumstances shall analytical data generated pursuant to this Consent Order be considered confidential.
- E. If Respondents are unable by reasonable efforts to access property as necessary pursuant to this Consent Order, the Division shall promptly assist Respondents in obtaining access upon receipt of a request submitted in writing to the Director.

IX. DELAY IN PERFORMANCE

As soon as Respondents become aware of any potential for delay, they shall submit to the Division written documentation of the reasons for the delay and the efforts to be made by Respondents to avoid such potential delay, as well as a time by which such work reasonably can be completed. The Division shall review the documentation and shall promptly approve the new schedule if good cause is shown, such approval not to be unreasonably withheld. Good cause may include, but is not limited to, extraordinary weather, natural disasters, emergencies and the inability to obtain permits or approvals from any federal, state, or local agency or body politic. At a minimum, good cause does not include normal inclement weather, reasonable increases in the cost of work to be performed under this Consent Order, financial difficulty for Respondents in performing such work, failure by Respondents to satisfy the obligations under this Consent Order (whether evidenced by a notice of deficiency or not), acts or omissions of Respondents' contractors or the failure of the Respondents' contractors or representatives to make complete and timely application for any required approval or permit. The Respondents will bear the burden of demonstrating good cause for delay, and that the delay proposed is warranted.

X. DISPUTE RESOLUTION

- A. If either the City or the Group disagrees either in whole or in part with any decision of the Division, it shall notify the Division within 30 days of receipt of the disapproval or other decision. The parties shall have an additional 30 days to resolve the dispute. If agreement is reached, the resolution shall be reduced to writing, signed by each party and incorporated thereupon into this Consent Order. If agreement is not reached, the Parties agree to engage in mediation using a mediator mutually agreed upon by the Parties. If the Parties cannot agree on a mediator, the Chairperson of the Dispute Resolution Section of the N.C. Bar Association shall appoint a mediator. If agreement is not reached through mediation, the Division shall issue a final decision on the dispute, in writing, to inform Respondents of the decision by the Division.
- B. Either the City or the Group may, within 15 days of service of the final decision, commence a contested case by filing a petition under N.C.G.S. 150B-23. Hearings shall be conducted in accordance with the provisions of the North Carolina Administrative Procedures Act, N.C.G.S. 150B-22 et seq.
- C. The dates or deadlines in the FS Work Plan shall be extended automatically in circumstances where the City or the Group in good faith seek resolution of any dispute arising in connection with this Consent Order. Such extensions shall be for such period of time as shall be reasonably necessary to engage in meaningful dispute resolution pursuant hereto.

XI. PUBLIC PARTICIPATION

The Director shall undertake a program of public participation, including opportunity for notice and comment as appropriate, in substantial conformance with the National Contingency Plan and applicable North Carolina law.

XII. CONTRIBUTION PROTECTION

Pursuant to 42 U.S.C. § 9613(f)(2), this Consent Order is an administrative settlement with the State of North Carolina. The Division acknowledges that by the Parties' entry and Respondents' performance of this Consent Order, the Division extends contribution protection to the Respondents to the fullest extent possible under applicable federal, state and common law, including without limitation the contribution protection provided in accordance with 42 USC § 9613(f)(2).

However, this Consent Order does not discharge any person, whether or not a signatory to this Consent Order, from any claims pursuant to CERCLA § 9607, CERCLA § 9613 or any other statutory or common law relating to costs incurred in connection with hazardous substances that the person arranged to dispose or treat at the Landfill or that the person transported to the Landfill. This

Consent Order also does not discharge claims brought against a member of the Seaboard Group II that is not a signatory to this Consent Order or that fails to pay its share of the costs of implementing the Group's obligations under this Consent Order as determined in accordance with the Seaboard Group II Joint Defense and Participation Agreement.

"Matters addressed" in this Consent Order shall include the work identified in Section VI of this Consent Order, costs already incurred by the Division in connection with the Site and costs to be incurred by the Division in oversight of the activities described in this Consent Order.

XIII. OTHER CLAIMS AND PARTIES

Nothing in this Consent Order shall constitute or be construed as a release of any claim, cause of action or demand in law or equity against any person, individual, firm, partnership, corporation or other entity not a signatory to this Consent Order including, but not limited to, any liability it may have arising out of or relating in any way to the generation, storage, treatment, handling, transportation, release or disposal of any hazardous constituents, hazardous substances, hazardous wastes, pollutants, or contaminants found at, taken to, released at, or taken from the Site. Upon request of Respondents, the Division agrees to provide reasonable assistance with enforcement of Respondents' claims against such third parties. The assistance referred to herein may include, but shall not be limited to, making records available which relate to this matter, providing statements or testimony of staff upon notification when such assistance is relevant to the proceedings, or such other enforcement assistance as is reasonable and appropriate.

The Division hereby expressly reserves a cause of action for any claims of whatever kind or nature not subject to this Consent Order which it may have or hereafter acquire against any other person or persons not afforded protection hereunder.

XIV. COVENANT NOT TO SUE

Subject to any reservations of rights in this Consent Order, the Parties intend that by entering into and carrying out the terms of this Consent Order, Respondents will have resolved the entirety of their respective alleged liabilities to the State of North Carolina under all applicable federal, state, and local laws and regulations for matters addressed in this Consent Order. Performance of the activities described in the FS Work Plan approved by the Division will satisfy the requirements for a feasibility study and/or corrective measures study pursuant to Article 9 of N.C.G.S. Chapter 130A, CERCLA and RCRA.

The parties acknowledge that the Division's covenant not to sue does not extend to the remediation of any soil and/or groundwater contamination that may exist at the Site which the Respondents may commit to undertake at some future date.

For purposes of this provision, the phrase "matters addressed" shall include the undertaking as identified in Section VI of this Consent Order of a Feasibility Study of the Site. However, the use of non-locking snap hooks with any fall protection system is prohibited as of July 1, 1995. Qualified employees may free climb wood poles if the employer can ensure (1) that the employee is able to comfortably and safely grip the pole with both hands while climbing, (2) that the pole is free from attachments or any configurations of attachments that will materially impair the ability of a qualified employee to safely free climb the pole, (3) that the pole is otherwise free from impediments, contaminants or conditions of any type, including but not limited to ice, high winds or chemical treatments which materially impair the ability of a qualified employee to safely free climb the pole, and (4) that the employee is able to climb such structures without material physical impairments including over-exertion, lack of sleep or other physical stresses."

29 CFR 1910.269 as amended above is effective January 1, 1995, except that employers have until July 1, 1995, to implement the use of locking snap hooks, and employers have until January 1, 1996, to design and implement a system of fall protection for use by employees while ascending, descending or changing locations on towers. Also, 29 CFR 1910.269(a)(2) *Training* is effective January 31, 1995, and 29 CFR 1910.269(v)(11)(xii) is effective February 1, 1996.

(4) Subpart Z -- Toxic and Hazardous Substances:

(a) ~~(A)~~ 29 CFR 1910.1000 Air Contaminants:

Revision of 1910.1000 (a) and (f), removal of Table Z-2 and Table Z-3 and re-adoption of revised permissible exposure limits as Table Z-1 as originally published in 54 FR (January 19, 1989) pages 2923 - 2958 as follows:

" §1910.1000 Air contaminants.

An employee's exposure to any substance listed in Table Z-1 of this section shall be limited in accordance with the requirements of the following paragraphs and sections.

(a) **Table Z-1.(1) Substances with limits designated by "C" - Ceiling Limits.** An employee's exposure to any substance in Table Z-1, the exposure limit of which is followed by a "C", shall at no time exceed the exposure limit given for that substance in Table Z-1.

(2) *Current permissible exposure limits.* An employee's exposure to any substance listed in Table Z-1 shall not exceed the Time Weighted Average (TWA), Short Term Exposure Limit (STEL) and Ceiling Limit specified for that substance in Table Z-1 under the Current PEL column.

(3) *Skin Designation.* To prevent or reduce skin absorption, an employee's skin exposure to substances listed in Table Z-1 with an "X" in the Skin Designation column following the substance name shall be prevented or reduced to the extent necessary in the circumstances through the use of gloves, coveralls, goggles, or other appropriate personal protective equipment, engineering controls or work practices.

(4) *Definitions.* The following definitions are applicable to the Current PEL column of Table Z-1:

(i) Time weighted average (TWA) is the employee's average airborne exposure in any 8-hour work shift of a 40-hour work week which shall not be exceeded.

(ii) Short term exposure limit (STEL) is the employee's 15-minute time weighted average exposure which shall not be exceeded at any time during a work day unless another time limit is specified in a parenthetical notation below the limit. If another time period is specified, the time weighted average exposure over that time period shall not be exceed at any time during the working day.

(iii) Ceiling is the employee's exposure which shall not be exceeded during any part of the work day. If instantaneous monitoring is not feasible, then the ceiling shall be assessed as a 15-minute time weighted average exposure which shall not be exceeded at any time over a working day.

(5) *Additional Definitions.* The terms "substance," "air contaminant," and "material" are equivalent in meaning for 29 CFR 1910.1000.

(b) and (c) are reserved.

(d) and (e) are not amended.

(f) *Effective dates.* (1) The effective date for the permissible exposure limits specified in the following Current PEL column of Table Z-1 is March 7, 1997.

LIMITS FOR AIR CONTAMINANTS

PROPOSED RULES

NOTE: Because of the length of the table, explanatory Footnotes applicable to all substances are given below.

Footnote (1) The PELs are 8-hour TWAs unless otherwise noted; a (C) designation denotes a ceiling limit. They are to be determined from breathing-zone air samples.

Footnote (2) Parts of vapor or gas per million parts of contaminated air by volume at 25 degrees C and 760 torr.

Footnote (3) Milligrams of substance per cubic meter of air. When entry is in this column only, the value is exact; when listed with a ppm entry, it is approximate.

Footnote (4) The CAS number is for information only. Enforcement is based on the substance name.

Footnote (5) Regarding Styrene Only: OSHNC recognizes that the permissible exposure limits for styrene may not be achievable solely through engineering and work practice controls for boat-building and operations comparable to boat building. Comparable operations are those that (1) employ the manual layup and sprayup process, (2) the manufactured items that utilize the same equipment and technology as that found in boat building, and (3) the same considerations of large part size, configuration interfering with air-flow control techniques, and resin usage apply. Examples of operations comparable to boat building would include the manufacture of large above-ground or below-ground storage tanks, large parts for

recreational vehicles, and large duct work. Because it is impossible to define in advance every manual layup and sprayup process for which compliance may not be feasible solely through engineering and work practice controls, some guidelines concerning part size and configuration issues are necessary. The primary question for manual layup and sprayup operations is whether the part's size and configuration interfere with normal air-flow techniques. For operations making parts (such as tubs and vanities) that do not meet the guidelines described, beginning April 1, 1996, the hierarchy of controls specified in 29 CFR 1910.1000(e) will apply to reduce styrene exposures to the new 50 ppm TWA and 100 ppm STEL. In consequence, the burden of proof will be on the employer to show that engineering and work practice controls are not feasible for specific operations. However, with respect to boat-building operations the burden of proof would be on OSHNC to prove that the level could be attained solely through engineering and work practice controls.

Footnote (6) Regarding Carbon Dioxide only: no change was made to the PEL.

Footnote (7) Regarding Subtilisins only: this substance is not included in Table Z-1 below.

SECTION .0300 - CERTIFICATION

.0310 STANDARD EXAMINATIONS

(a) ~~The NTE are the standard examinations required for initial certification. The Educational Testing Service is replacing many of the NTE tests with a new series of assessments called PRAXIS. Persons may voluntarily take the PRAXIS tests before July 1, 1995, at state expense and use those scores for certification. The PRAXIS tests are required for persons who take tests after July 1, 1995.~~

(1) ~~For formal admission into an approved teacher education program, a person must score at least 646 on the Communication Skills Test and 645 on the General Knowledge Test. These requirements apply to persons who have not passed these tests by January 1, 1990. These requirements do not apply to persons whose specialty area is school social work, school counseling or school psychology. The PRAXIS I tests are given as pencil-and-paper (PPST) or as computer-based (CBT). Passing scores for those tests are:~~

~~(A) Reading: 176 PPST; 323 CBT~~

~~(B) Writing: 173 PPST; 319 CBT~~

~~(C) Mathematics: 173 PPST; 318 CBT~~

(2) ~~All applicants for initial certification must score at least 649 on the Professional Knowledge Test.~~

(3) ~~Effective July 1, 1994, in addition to the Professional Knowledge Test, each applicant for initial certification must meet minimum teaching area scores as follows:~~

(N)	English Language and Literature	520
(O)	English Language and Literature (Middle Grades Language Arts)	460
(P)	French	540
(Q)	German	540

(NN)	Teaching Hearing Impaired Students	650
(OO)	Teaching Learning Disabled Students	610
(PP)	Teaching Visually Handicapped Students	550

(4) If no teaching area score is possible under Paragraph (a)(3) of this Rule, the Professional Knowledge score satisfies the NTE requirement.

(5) Based on the special nature of the preparation for certification, School Social Workers are excluded from NTE regulations and School Psychologists are required to take only the Area examination for School Psychologists.

(b) Instead of the NTE scores an applicant, except a North Carolina approved program graduate at the Class A level, may be certified on the basis of the Graduate Record Examinations with minimum scores of 380 on the Verbal Ability, 410 on the Quantitative Ability, and 380 on the Analytical Ability examinations.

(c) PRAXIS scores consist of two or more modules for each test area, the scores of which are added to yield a total score. The total required score for an area is based on the total of the validated study scores for each module within the test. However, the SBE uses a compensatory score model, by which a person may score two standard errors of measure (SEM) below the validated score on individual modules. In this case, the person must score higher than the validated score on another module to achieve the total required score.

conspicuously be marked immediately after the containers are closed in accordance with the following regulations:

- (1) The name and address (including zip code) of grower, packer, shipper, or distributor must be shown on the principal display panel.
- (2) The name of the product must be shown on the principal display panel.
- (3) The variety of apples must be shown; however, it may be shown on the principal display panel or on the bag closure. The words "Variety Unknown" may be used in lieu of the variety on containers in which apples are packed that are normally marketed during the summer months and meet the grade U.S. No. 1,

Early.

- (4) The variety of peaches must be shown on the principal display panel. The words "Clingstone Peaches," "Semi-clingstone Peaches," or "Freestone Peaches," as applicable, may be used in lieu of variety.

- (6) The minimum size must be shown on the principal display panel; however, when fairly uniform size apples or peaches are packed in a container and sold by count, count may be used in lieu of net weight and minimum size markings. However, overwrap packages that contain six or less apples or peaches that are fully visible to the purchaser need not include a statement of count.
- (7) Apple containers must show the applicable U.S. Grade on the principal display panel or be marked "Unclassified," "Not Graded," or "Grade Not Determined." Peach containers are not required to show grade markings; however, when grade is shown, the product must meet that standard.

.0123 CASE MGMT SVCS/ADULTS/CHILDREN AT-RISK/ABUSE/NEGLECT/EXPLOITATION

(a) Case management is a set of interrelated activities under which responsibility for locating, coordinating and monitoring appropriate services for an individual rests with a specific person or organization. The purpose of case management services for adults and children at-risk of abuse, neglect, or exploitation is to assist them in gaining access to needed medical, social, educational, and other services; to encourage the use of cost-effective medical care by referrals to appropriate providers; and to discourage over-utilization of costly services. Case management services will provide necessary coordination with providers of non-medical services such as nutrition programs like WIC or educational agencies, when services provided by these entities are needed to enable the individual to benefit from programs for which he or she is eligible. The set of interrelated activities are as follows:

- (4) Providing assistance to the client in locating and referring him or her to providers or programs that can meet the service needs.
- (5) Coordinating delivery of services when multiple providers or programs are involved in care provision.
- (6) Monitoring and following-up to ensure services are received, adequate to meet the client's needs, and consistent with good quality of care.

 - (5) Who reside in counties providing the non-Federal matching funds to offer this service.
- (c) The case manager shall determine whether an adult or child is at-risk of abuse, neglect, or exploitation as follows:
- (1) **At-Risk Adult:** An at-risk adult is an individual who is at least 18 years old, or an emancipated minor, and meets one or more of the following criteria:

 - (B) An individual with no consistent identified caregiver, who is unable to perform at least one of the activities of daily living (bathing, dressing, grooming, toileting, transferring, ambulating, eating, communicating); or
 - (C) An individual with no consistent identified caregiver, who is unable to carry out instrumental activities of daily living (managing financial affairs shopping, housekeeping, laundry, meal preparation, using transportation, using a telephone, reading, writing); or
 - (D) An individual who was previously abused, neglected or exploited, and the conditions leading to the previous incident continue to exist; or
 - (E) An individual who is being abused, neglected, or exploited and is in need of protection.
 - (2) **At-Risk Child:** An at-risk child is an individual under 18 years of age who meets one or more of the following criteria:
 - (A) A child with a chronic or severe physical or mental condition whose parent(s) or caretaker(s) are unable or unwilling to meet the child's care needs;

 - (E) A child who is being abused or neglected and is in need of protection.
- (d) Enrollment of providers shall be accomplished in accordance with section 1902(a) (23) of the Social Security Act.
- (1) **Case Manager Qualifications.** Case managers must meet the following qualifications:

STATE OF NORTH CAROLINA

COUNTY OF MOORE

IN THE OFFICE OF
ADMINISTRATIVE HEARINGS
96 EHR 1969

LEROY ANDERSON, Petitioner, v. COUNTY OF MOORE DEPARTMENT OF HEALTH, Respondent.))))))))))	RECOMMENDED DECISION
--	--	-----------------------------

The above-captioned contested case was heard before Administrative Law Judge, Fred G. Morrison, Jr., on June 2, 1997 in Raleigh, North Carolina.

APPEARANCES

For Petitioner:	Petitioner did not appear and was not represented by counsel at the hearing.
For Respondent:	Kathryn J. Thomas Assistant Attorney General N.C. Department of Justice P.O. Box 629 Raleigh, North Carolina 27602-0629

ISSUE

Did the Respondent, Moore County Health Department, err in determining that, based on the Application for an Improvement Permit submitted to the Respondent on behalf of the Petitioner, the property at Lot 2488, Seven Lakes Country Club, is unsuitable for a ground absorption sewage system for the proposed intended use?

FINDINGS OF FACT

1. The North Carolina Department of Environment, Health & Natural Resources (DEHNR) has the authority and responsibility under North Carolina General Statutes Chapter 130A to promulgate rules regulating the installation of on-site residential sewage disposal systems.
2. Respondent has promulgated rules, codified at 15A N.C.A.C. Subchapter 18A, regulating on-site residential sewage disposal.
3. Environmental Health Specialists employed by the Moore County Health Department act as agents of DEHNR when applying statutes and rules concerning the regulation of on-site residential sewage disposal in North Carolina.
4. The Petitioner, LeRoy Anderson, and his wife, Marion Anderson, purchased lot 2488, Seven Lakes Subdivision, Moore County in 1980.
5. On May 7, 1986, Mark S. Fry, a sanitarian with the Moore County Health Department performed a site evaluation on lot number 2488, in the Seven Lakes subdivision at the request of Lucretia Pinnock, agent for the owners, as indicated on a form entitled "Moore County Health Department Site Evaluation Results on Lots for Sub-Surface Sewage Disposal". (Respondent's Exhibit Number 3)
6. The information provided on the form stated that, as to the lot area, there was no plat provided. Mr. Fry found that the "lot is suitable on the left side," and approved it "for a three or four bedroom house."
7. The evaluation form also contained the following statement: "RESULTS OF EVALUATION ARE BASED ON THE SITE IN ITS PRESENT STATE. HOUSE SIZE AND LOCATION, DRIVEWAY LOCATION AND OTHER FACTORS MAY ALTER THE STATUS OF THE SITE."

8. No improvement permit was issued in 1986. If a permit had been issued at that time, the permit would have expired after three years of its issuance.
9. An application for an improvement permit for a subsurface sewage disposal system dated March 8, 1996 was submitted to the Moore County Health Department by C.L. Williams, Jr., as representative of the owners. (Respondent's Exhibit Number 1)
10. Attached to the application were site plans for Lot 2488, Seven Lakes Subdivision submitted on behalf of the Petitioner, and a Site/Soil Evaluation for On-Site Wastewater form (hereinafter "evaluation form") which was completed by Mr. Charles Riggs, Registered Sanitarian, Specialist for the Moore County Health Department from his on-site evaluation.
11. Mr. Riggs evaluated the property on April 1, 1996 and April 8, 1996. He took soil samples using auger borings in seven different locations on the property, taking into account the location of the house, driveway and lot lines as indicated on the site plans attached to the application. Mr. Riggs made notes of his findings on the evaluation form. He found three samples to be provisionally suitable, three samples to be unsuitable, and one sample to be suitable.
12. On April 17, 1996, Mr. Riggs sent a letter to the Petitioner and his wife with his findings. (Respondent's Exhibit Number 2) The letter stated that from his evaluation, the site is unsuitable for installation of a ground absorption sewage system based on unsuitable soil wetness, insufficient soil depth and insufficient available space, citing Sections .1942, .1943 and .1945 of Title 15A, Subchapter 18A of the North Carolina Administrative Code respectively. The letter indicated that the Petitioner and his wife had the right to an informal review by the supervisor of the health department and by the regional staff of the state agency. The letter also stated that a private consultant might be employed to assist in having the site reclassified to provisionally suitable. Finally, the letter informed the Petitioner of his right to an appeal by filing a petition for a contested case hearing with the Office of Administrative Hearings.
13. Mr. Samuel Fields, supervisor of the Environmental Health Section of the Moore County Health Department reviewed Mr. Riggs' evaluation and concurred with the result. Mr. Fields discussed with the Petitioner the possibility of obtaining additional information, including hiring a backhoe so that the health department might evaluate the site based on more information.
14. Additional informal discussions were held in an attempt to find alternatives to a conventional underground sewage treatment system for the site.
15. Scott Greene, Regional Soil Specialist with the Department of Environment, Health and Natural Resources also visited the site for further evaluation.
16. Mr. Greene is an expert in soil science, including the evaluation of sites for installation of ground absorption wastewater systems, and modified and alternative wastewater systems. Based on the information provided by the Petitioner on the application and his own on-site evaluation, Mr. Greene concurred with the soil criteria assessment, that there was insufficient space to install a system, and that as to overall site suitability, the site was appropriately classified as unsuitable. However, Mr. Greene also found that the site might be reclassified as provisionally suitable for a modified system, provided that a site plan complying with the design criteria for such a system would first be submitted to the Moore County Health Department for approval.
17. 15A N.C.A.C. 18A .1948 provides, in pertinent part:
"(c) Sites classified UNSUITABLE have severe limitations for the installation and use of a properly functioning ground absorption sewage treatment and disposal system. An improvement permit shall not be issued for a site which is classified as UNSUITABLE. However, where a site is UNSUITABLE, it may be reclassified PROVISIONALLY SUITABLE if a special investigation indicates that a modified or alternative system can be installed in accordance with Rules .1956 or .1957 of this Section.
18. The design criteria for a modified system are found in Rule .1957.

CONCLUSIONS OF LAW

Based on the foregoing findings of fact, I make the following conclusions of law.

1. The parties are properly before the Office of Administrative Hearings.

2. The 1986 evaluation performed by Mark Fry is not relevant to the 1996 evaluation performed by Charles Riggs for the following reasons: the location of the lot evaluated was not clear on 1986 evaluation request form; the 1986 evaluation request form does not include a site plan and the form specifically states that the status of the site could differ depending on the house size and location and driveway location; no permit was issued based on the 1986 evaluation; and even if a permit had been issued in 1986, the permit would have expired within three years of its issuance.

3. Based on the information provided by the Petitioner in the 1996 permit application, and the on-site evaluation by the Moore County Health Department and the Regional Soil Specialist with DEHNR, the soils on the Petitioner's site were properly found to be unsuitable due to soil wetness, insufficient soil depth and insufficient available space, and that the site was therefore properly determined to be unsuitable for installation of a ground absorption sewage system.

4. Based on the criteria in Rule .1947, three soil samples were found to be provisionally suitable, one soil sample was found to be suitable, three other soil samples were found to be unsuitable, and insufficient available space was found overall to permit the installation and proper functioning of ground absorption sewage treatment and disposal system.

5. A modified system may be appropriate for Petitioner's site, but the Petitioner has not submitted appropriate documentation to the Moore County Health Department which would include site plans which would satisfy design criteria for design of alternative sewage systems pursuant to Rule .1957.

6. Based on the foregoing, the Respondent did not act arbitrarily or capriciously in finding Petitioner's site unsuitable for the installation of a ground absorption sewage treatment and disposal system.

7. Based on the foregoing, the Respondent followed proper procedure in finding the Petitioner's site unsuitable for the installation of a ground absorption sewage treatment and disposal system.

8. Based on the foregoing, there is substantial evidence to support Respondent's decision to find Petitioner's site unsuitable for the installation of a ground absorption sewage treatment and disposal system.

RECOMMENDED DECISION

The Respondent's decision to classify the Petitioner's site as unsuitable for installation of a ground absorption sewage system should be affirmed.

ORDER

It is hereby ordered that the agency serve a copy of the final decision on the office of Administrative Hearings, P.O. Drawer 27447, Raleigh, N.C. 27611-7447, in accordance with North Carolina General Statute § 150B-36(b).

NOTICE

Administrative Law Judge

The North Carolina Administrative Code (NCAC) has four major subdivisions of rules. Two of these, titles and chapters, are mandatory. The major subdivision of the NCAC is the title. Each major department in the North Carolina executive branch of government has been assigned a title number. Titles are further broken down into chapters which shall be numerical in order. The other two, subchapters and sections are optional subdivisions to be used by agencies when appropriate.
